

## Quality & Security Technician

### Company Background

A core revenue stream for Airframe Designs Limited is the delivery of engineering services to support mechanical design solutions for the aviation, defence and space sectors.

Our Turn-Key offering for mechanical structures involves combining design, analysis, certification and manufacturing solutions to deliver optimised products.

### Job Description

The Quality and Security Technician is responsible for maintaining all of the management systems that govern business activity and operations, focussing on continual improvement and independent system monitoring, including day to-day management of the:

- Integrated Management System to international standards (i.e., AS9100, ISO 27001, ISO 14001).
- Cyber Essentials and Cyber Essentials Plus accreditations.
- Physical security (premises).
- Workforce training and awareness across systems.
- Liaising with consultants and certification bodies during the implementation and continued accreditation of all systems.
- Chairing monthly management meetings and IMS reviews.
- Future UK CAA Part21 approvals.

### Skills & Knowledge

- Proven experience in IMS systems (quality, information security, environmental), in highly regulated settings, is highly desirable.
- Good computing literacy and high proficiency in MS Office.
- The ability to communicate clearly and confidently both within the business and externally with customers.
- The ability to work independently to provide creative solutions to problems.
- The ability to work efficiently and accurately to a 'required' and consistent standard.
- Organisational skills including the ability to manage multiple tasks/projects – prioritising, planning and delegating tasks.
